Senior Software Developer / Team Lead / Scrum master

CAREER OBJECTIVE

Technical Lead and Scrum Master with 15+ years of experience delivering web applications and leading distributed engineering teams. Strong background in frontend architecture, agile coaching, stakeholder collaboration, and mentoring developers. Passionate about building high-performing teams and delivering products that solve real-world problems at scale.

KEY ACHIEVEMENTS

- Led a remote frontend team for 10+ years in an international NGO-focused product.
- Acted as Scrum Master, facilitating agile delivery and continuous improvement initiatives.
- Mentored developers and supported career growth across the engineering team.
- Led frontend architecture decisions and modernization efforts.
- Delivered software used by human rights organizations worldwide.

EXPERIENCE

Huridocs, Remote — Senior Software Developer

Apr 2016 - PRESENT

Led frontend development for a human rights documentation platform for NGOs, owning frontend architecture, technical decisions, and agile delivery as Team Lead and Scrum Master. Mentored developers and drove continuous improvement while contributing hands-on to product development.

Funding Circle, UK — Front End Engineer

Jan 2015 - Apr 2016

Designed and implemented user interfaces for Funding Circle's lending platform for small businesses, with a focus on web performance and cross-functional delivery. Collaborated with product and engineering stakeholders to ship high-quality frontend solutions.

FRONTEND SKILLS

HTML, CSS, JS, TypeScript, SQL, Mongo, React, Git, TDD, NodeJS, Cypress, Express, Http, Sockets, SOLID principles

BACKEND/OTHER

SQL, Mongo, Git, TDD, NodeJS, Cypress, Express, Http, Sockets, SOLID principles

SOFT SKILLS

SCRUM, Agile, Mentoring
Project management, Code reviews

LANGUAGES

Spanish (Native)

English (Fluent)

ThoughtWorks, Ecuador —Consultant Developer

Feb 2014 - Oct 2014

Advised on JavaScript, AngularJS, and agile methodologies for a New York-based client project while working as a Consultant Developer at ThoughtWorks. Contributed through technical guidance and continued skill development in talks, conferences, and workshops.

LevelAp, Ecuador — Software Developer

Sep 2012 - Jan 2014

As a developer, agile consultant, and team leader at Levelap, I played a crucial role in creating a culture based on agility and focused on technical excellence, continuous improvement, and emergent design while developing an ERP for the Ecuadorian market. "Pair programming" and "TDD" were everyday practices.

CodeBox, Spain — Software Developer

Nov 2009 - Sep 2012

Codebox offered me the opportunity to improve my skills in different areas, and my colleagues and I always took advantage of opportunities to try new tools, technologies, and methodologies. It's worth mentioning the latest project, a web application for managing medical clinics, based on CodeIgniter, with a frontend based on Backbone.js.

EDUCATION

Centro de Evaluación Informática, Spain

2005 - 2007

Course in programing web applications and computer Programming

Escuelas san jose, Location — Degree

2002 - 2004

Medium Degree in electronic, Electrical and Electronics Engineering
